Specialists in printing blanket technology

Press Ready Coating Blankets

Description

High quality press ready coating blankets precisely cut to individual press types delivering savings, accuracy and flexibility to commercial and packaging printing sectors.

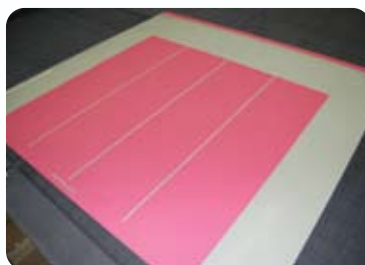

Press Ready Coating Blanket

Press Ready Coating Blanket Bureau Service

Servicom Pacific utilises Esko Kongsberg technology to service the Asia/Pacific market. This automated cutting table enables Servicom Pacific to provide our new and existing customers with accurate cutting of varnish blankets used for spot and flood coating applications. Customer supplied artwork files are converted utilising state of the art Artios CAD software which is networked to the cutting table for conversion. This software guarantees a cut contour that perfectly matches the printed graphics supplied.

Applications

- Commercial** – Spot and Flood coating
- Packaging** – Spot and Flood coating
- Flexo** – Specific Applications
- Plastics** – Specific Applications
- Metal** – Spot and Flood coating

Features	Applications
Cost Savings	Allows printers to Spot and Flood Coat in house
Accuracy	Digital file ensures accuracy over entire blanket.
Prepress	Customer supplied files ensure exact specifications.
Press Ready	No production down time, reduces blanket preparation time, no stripping.
Customer Template Library	Artios CAD files are stored electronically for future use.
Proofing	Software utilised allows customer proofing via email for approval. Ability to proof actual size templates onto film.
Speed to Market	Electronically supplied file and CAD table ensure quick turnaround time.
