

# N340 SUPERCLASS

SP462 1.95MM/ SP461 1.70MM

Manufactured by

and converted by Servicom Pacific

## Application

The Superclass 8000 N340 blanket is from Day International. Built on today's Durazone compressible layer technology. A premium grade blanket with a compressible syntactic structure ideally suited to the needs of the modern printer.

Uniform closed cells give excellent dynamic recovery and consistency, together with sharp dot reproduction and resistance to mechanical damage on the press.

## Features

- Buffed surface
- Today's technology compressible layer
- High density carcass
- Better match of plate and blanket surface speeds.
- Solvent resistant face helps to eliminate surface tenderness, tackiness & swelling giving longer printing time than opposition

## Technical Data

Description	A buffed compressible quick release printing blanket
Type	Compressible
Colour	Blue
Surface	Buffed face
Thickness	3 ply 1.70mm 4 ply 1.95mm
Application	All high speed offset web applications
Compressibility	0,15 mm at 1060 kpa / .020 in at 2060 kpa
Tensile Strength	95 N / mm Typical
Elongation/ Stretch	< 9 % at 10 N / mm
Hardness	Surface: 77 shore A,
